

# MARIUSZ SZYSZKA

## Senior Technical Project Manager

+48 664429453 @ mariusz@szyszka.org www.szyszka.org Poland, Bydgoszcz

## SUMMARY

From writing and testing production code to leading customer-facing organizations, I bring a rare blend of engineering depth and executive delivery to help financial institutions build the future of compliant digital services. I specialize in turning complex AML and compliance challenges into scalable, data-driven products trusted by both regulators and frontline analysts.

A PMP and Agile certified leader, I operate at every layer: aligning with C-level stakeholders, guiding cross-functional teams, and staying close enough to the technology to challenge assumptions and unblock delivery. I've built and scaled teams from the ground up, embedding a culture of accountability, continuous improvement, and practical problem-solving.

No shortcuts - just years of building software, leading people, and delivering measurable results.

## EXPERIENCE

02/2025 - Present

Bydgoszcz, Poland

### Head Of Customer Service

#### BlackSwan Technologies / HUB Technologies

- Led global customer operations for AML compliance solutions, improving client satisfaction **by lowering incident volume by 20%**.
- Built and strengthened team expertise, **cutting R&D ticket escalations by 90%** at first and second line support.
- Designed and implemented technology-driven support leveraging AI tools to accelerate code investigation and root cause analysis, **reducing incident resolution time by 40%**.
- Collaborated with **cross-functional teams of 30+ people** to triage customer issues, chart the product roadmap's vision and direction, and maintain product knowledge.

02/2021 - 01/2025

Bydgoszcz, Poland

### Technical Delivery Manager

#### BlackSwan Technologies

- Delivered enterprise software that leverages big data and AI to control money laundering and financial crimes for a **Tier 1 international bank**, enabling client due diligence analysts to save hours of paperwork.
- Implemented artificial intelligence and machine learning-based solutions for a global financial institution to streamline AML operations for smart data gathering, surpassing project KPIs by 20%, including an average **process time reduction of 60%**.
- Managed engagements with over **10 financial institutions**, delivered client demos, and served as a technical, functional, and non-functional SME and trusted advisor.
- Led requirement definition, design while streamlining verification, validation, and release deployment, ensuring delivery up to **5% ahead of schedule** and **software quality with a pass rate exceeding 98%**.

07/2012 - 01/2021

Bydgoszcz, Poland

### Senior Project Manager

#### Atos

- Led a portfolio of related ServiceNow projects, responsible for a **multimillion-dollar budget**, resources, scope, and a **three-year schedule** to establish new tooling for IT service management.
- Directed cross-department teams of over 40 people to roll out 290+ customers in ServiceNow within budget, achieving a **98% stakeholder satisfaction rating**.
- Led QA strategy and project delivery, achieving >95% test automation coverage across 400+ test cases, **reducing manual testing effort by 80%**, accelerating time-to-market by 40%, and **decreasing post-release issues by 16%**.

12/2005 - 07/2012

Bydgoszcz, Poland

### Software Engineer

#### Lucent Technologies Bell Labs innovations

- Led **end-to-end software development lifecycle (SDLC)** activities from requirements through design, development, testing, and deployment, delivering solutions for major mobile network operators.
- Gathered and translated **customer requirements into technical specifications**, aligning business needs with system architecture to support the design and development of telecom solutions.
- Designed, developed and **executed thousands of test cases** to validate functionality, performance and user experience, ensuring high-quality delivery of telecom software solutions.
